DETAILS:
data: Step2B\HALLB\Bonus\200319A

The following are the results of Bonus 3 detector installed during the week of March $16^{\text {th }}$, 2020. Both Cebaf Mechanical and Beam Following coordinates are shown. In the BFS, a positive $X$ value is beam left, a positive $Y$ is up and negative $Z$ is upstream. Angles are in degrees.

It was agreed that the FMT detector would be measured after the run.
