

CASA Accelerator Physics
Bi-Weekly Report: 5/1/15 – 5/15/15
Submitted by: Todd Satogata

Here is the biweekly report from Physics. I use initials for group members as usual: AB=Alex Bogacz, DD=Dave Douglas, CT=Chris Tennant, AC=Alex Castilla, RG=Randy Gamage, TS=Todd Satogata. Apologies for running a bit late on this; I got back from Cincy about 8 PM last night and just crashed. I'll be around today and will be at the biweekly leadership meeting though.

CEBAF

- Optics support (AB)
- GlueX collaboration meeting, support McCaughan talk (TS)

Project E

- Running dry but trying to support halo analysis with remaining time
- Continued halo analysis (DD, CT)

MEIC

- Cooler re-engagement, lattice resurrection (DD, CT)
- LDRD proposal finalization (AB)
- Seminar: Space charge challenges of MEIC (AB)

LDRD

- No progress (microbunching info from CT in hands of Rui/Yves)

IPAC

- Paper/poster prep (All)
- Conference participation (All)

Travel/vacation

- IPAC15 (All except CT)
- TS: Partial FMLA May 14-15; IPAC15 Apr 29-May 8
