

SPECIFICATION CONTROL

JY1 OPTION

Models equipped with this option are in full accordance with the standard catalog specifications for their respective series, except as follows::

1. The high voltage stack top toroid is not provided.
2. The high voltage stack base, which would normally be used to mount the stack to the top of the driver cabinet, is not provided.
3. The driver cabinet is not provided.
4. The standard (short) driver to stack interconnect cables are not provided. The standard (long) driver to stack ground and signal interconnect cables are still provided, however, HVAC cables (8 ft) with supplemental insulation, are provided in place of the HVAC “test” cables normally provided.
