Al Tube
OD=8", Wall=1/8"

Al Dump
OD=8", Thick=1"

Electron Beam
5.5MeV/c

Au Target
OD=1", Thick=1 um

Virtual Detectors

- Before Target
- After Target
- Before Dump
- After Dump

Electrons
Photons

Just (finally!) getting started.

Help evaluate...

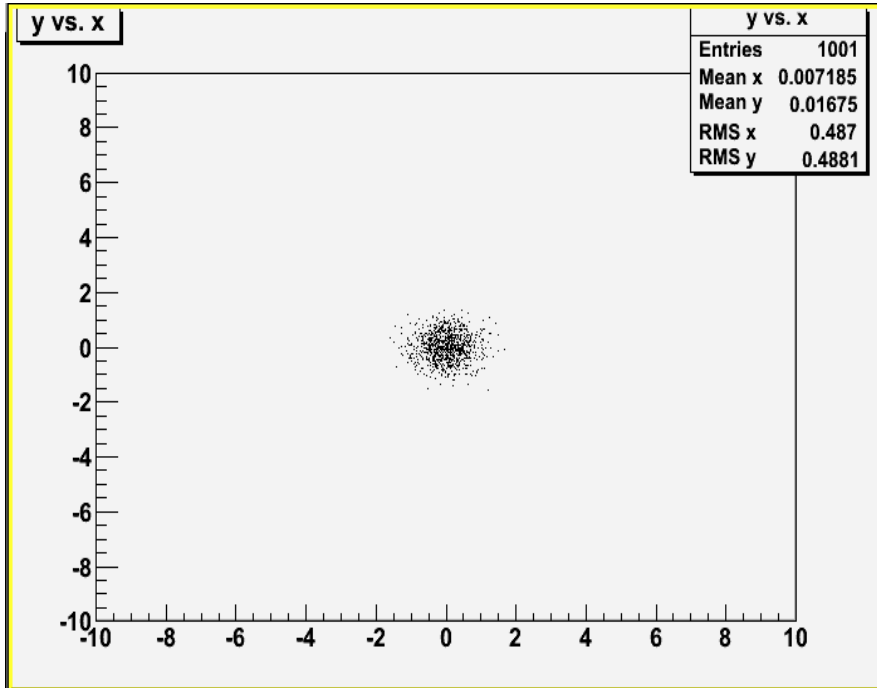

- Dump re-work
- Backgrounds

My PC processes ~30 events/sec

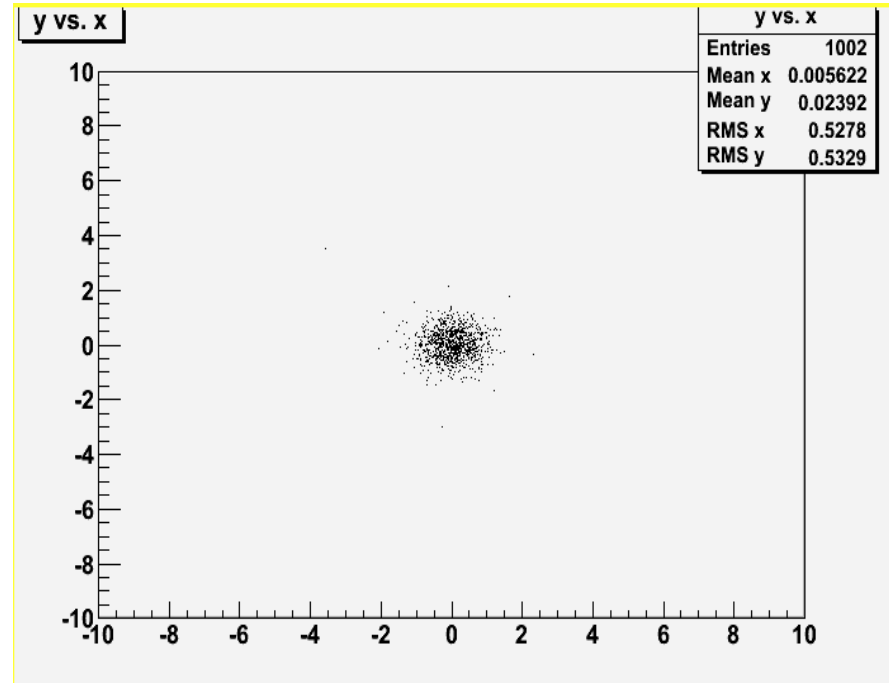

Ran 100k events today...

- Lost them
- One day at the wheel, still learning

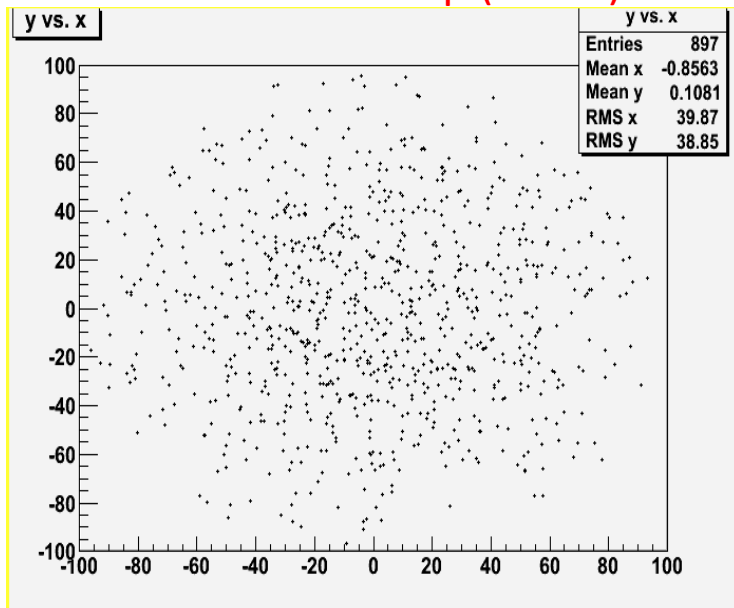

1001 e- before target

1001 e- & 1 photon after target

e- before dump ($P_z > 0$)

e- before dump ($P_z < 0$)

gamma before dump ($P_z > 0$)

gamma before dump ($P_z < 0$)
