

Web to Wiki

“Freeze” old web :

- Too much effort = not taking advantage of web resource + out dated
- Remove outdated material from homepage (pic, links, etc)
- Add redirect link to new wiki
- Remaining web page links for archival purposes (no more edits)
- Would happen immediately

http://www.jlab.org/accel/inj_group/index.html

“Carve” new wiki :

- Fast learning curve = web becomes productive tool + current
- Fixed home page with functional tree structure
- Would happen over next 2 weeks
