

Status of the Project

- Categories: conceptual design, real design, construction
 - Example Frame: conceptual design (100%), real design+construction: e.g. module assembly
- Percentage of completion - estimate
 - Example HV dividers: how many modules assembled?

Path toward Completion

- Estimate when subproject will be done
- Show that also working on, e.g.:
 - Slow controls/calibration software
 - Simulations
 - Data analysis software

Resources

- Need to show that collaboration has capability to take and analyze the data
- Demonstrate availability of resources
