

Germanium at KLF

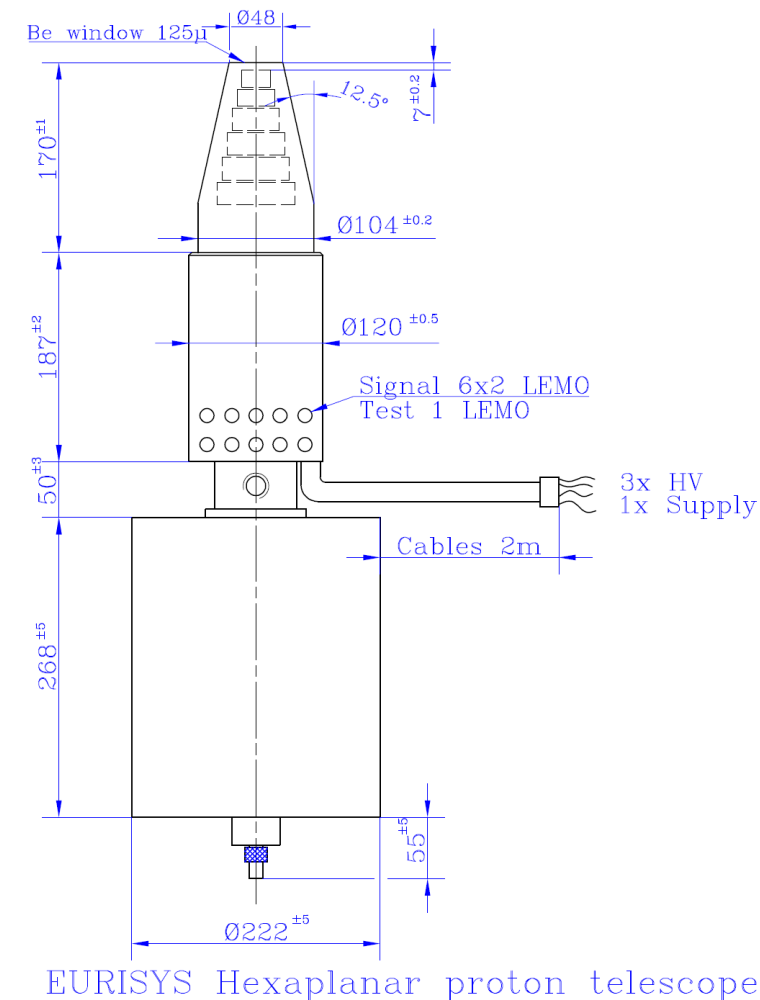

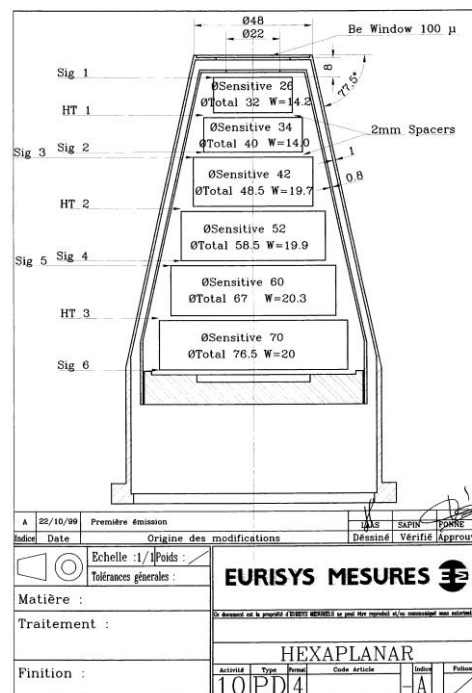

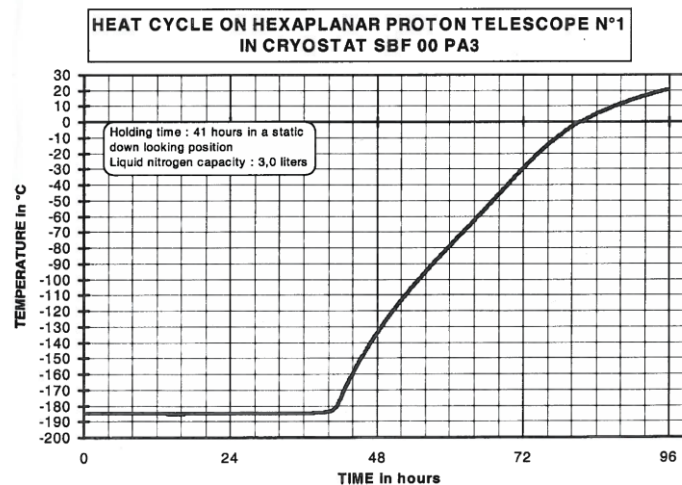

Airfreight box and detector boxes

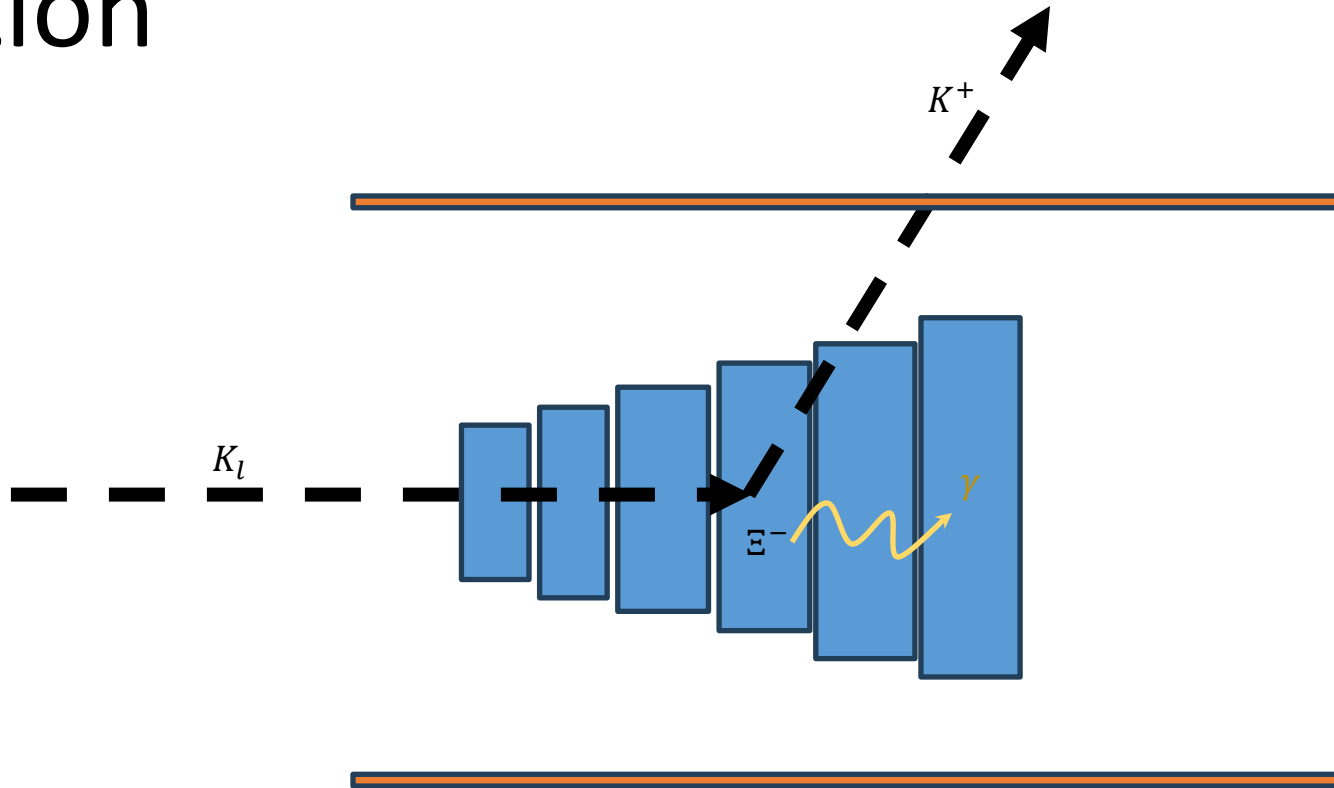

Detectors: Ge6

- 3l liquid nitrogen volume
- Up to 40h running
- 6 crystals per detector
- 5 detectors
- To be tested on neutron beam and annealed at RIKEN
- Available funding for building hypernuclei station
- Common Dewar for all detectors

Reaction

- 3l liquid nitrogen volume
- Up to 40h running
- 6 crystals per detector
- 5 detectors
