

# Pressure in Beam Pipes

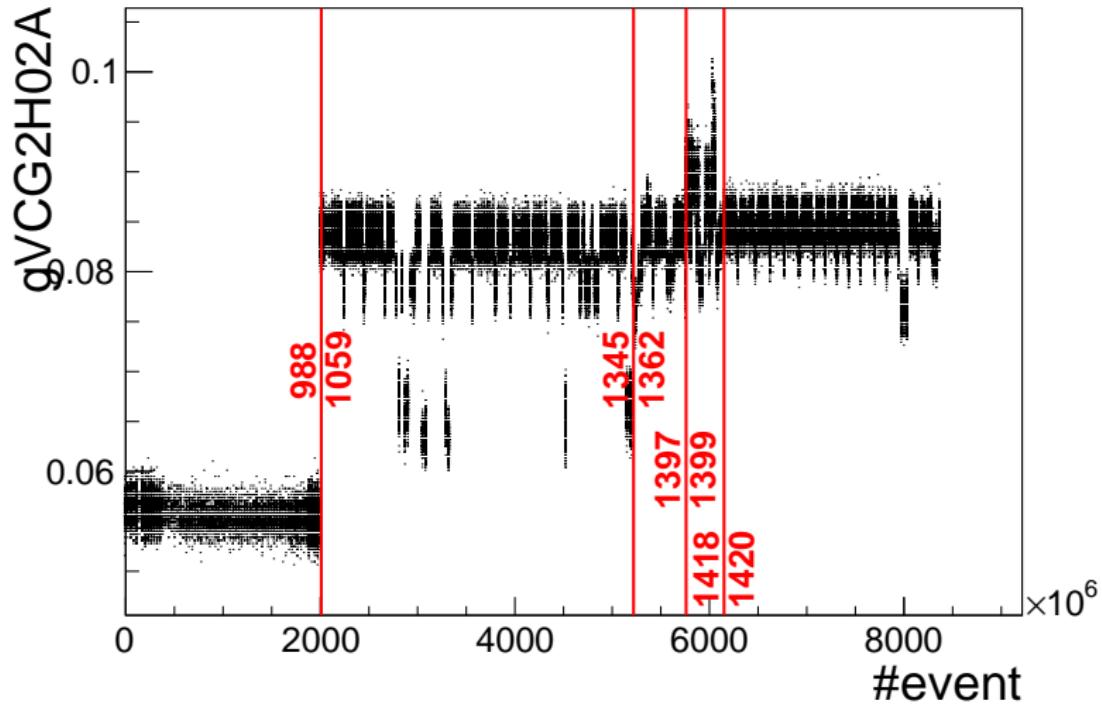

Maxime Levillain

February 17, 2017

- ▶ clusters (1) and (2) with radii  $R_1$  and  $R_2$ , and different distance  $z_1$  and  $z_2$
- ▶  $\Delta z = z_1 - z_2$
- $$z_{1,2} = \sqrt{\frac{(E+m) \cdot R_1 \cdot R_2}{2 \cdot m} + \frac{\Delta z^2}{4}} \mp \frac{\Delta z}{2}$$
- ▶ Needed for determining HyCal position with shower depth correction.
- ▶ Once the  $z$  is fixed, possible study of shower depth correction as a function of energy
