

Jefferson Lab Positron Working Group

JLab PWG Announcement – JPos17

The JPos17 International Workshop will be held in Summer/Fall 2017 at Jefferson Lab, Newport News, Virginia. It will cover innovative ideas and experimental projections that can take advantages of the unique positron source PEPPo at Jefferson Lab featuring 100 nA-10 μ A (CW) polarized positrons

JLab PWG Topics and Subgroups

Joe Games (games@jlab.org) & Eric Voutier (voutier@ipno.in2p3.fr)

- | | | |
|------------------------------------|---|----------------------------------|
| John Arrington, Charles Hyde | - | Interference Physics |
| Yulia Furletova, Wally Melnitchouk | - | Charged Current Physics |
| Marco Battaglieri, Xiaochao Zheng | - | Test of the Standard Model |
| Tony Forest, Farida Selim | - | Positron Applications |
| Joe Games, Vasiliy Morozov | - | Positron Source and Beam Physics |
