

Trigger Logic for 1 DAQ mode

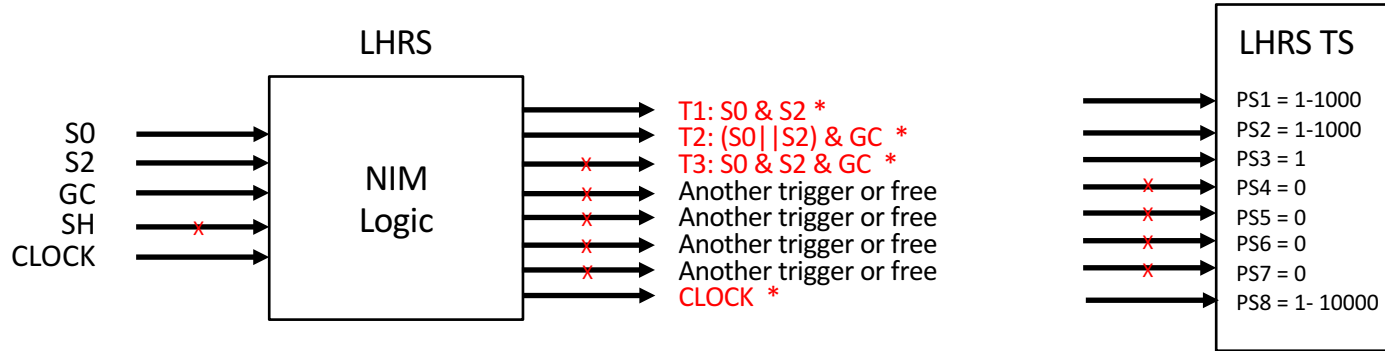

X : in/output not used in trigger design

*T3 is regenerated from T1 and T2 on RHRS to save one connection cable

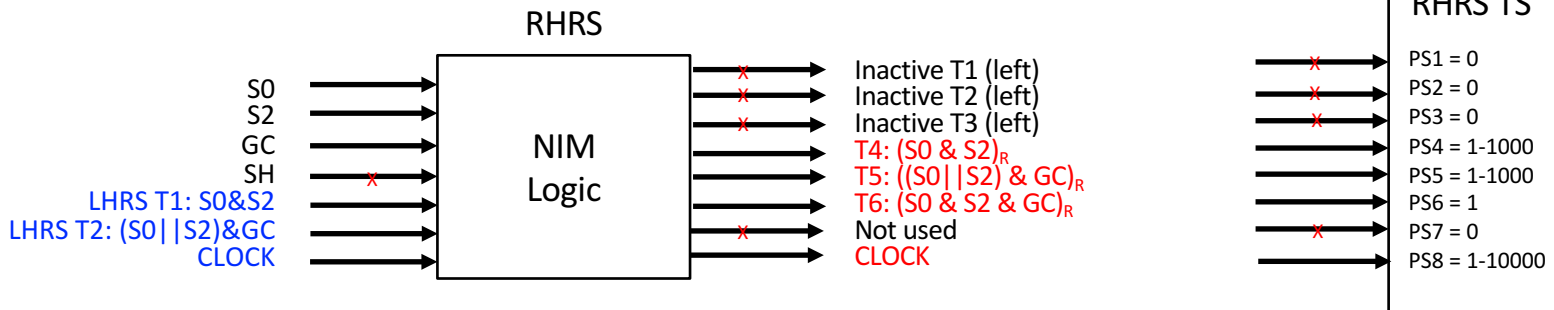

- Some of the signals on the RHRS have to be delayed to be in time with LHRs triggers
- T1 – T3 LHRs triggers - similar for all experiments
- T4 – T6 RHRS triggers (single or coincidence triggers)

Trigger Logic for 2 DAQ mode

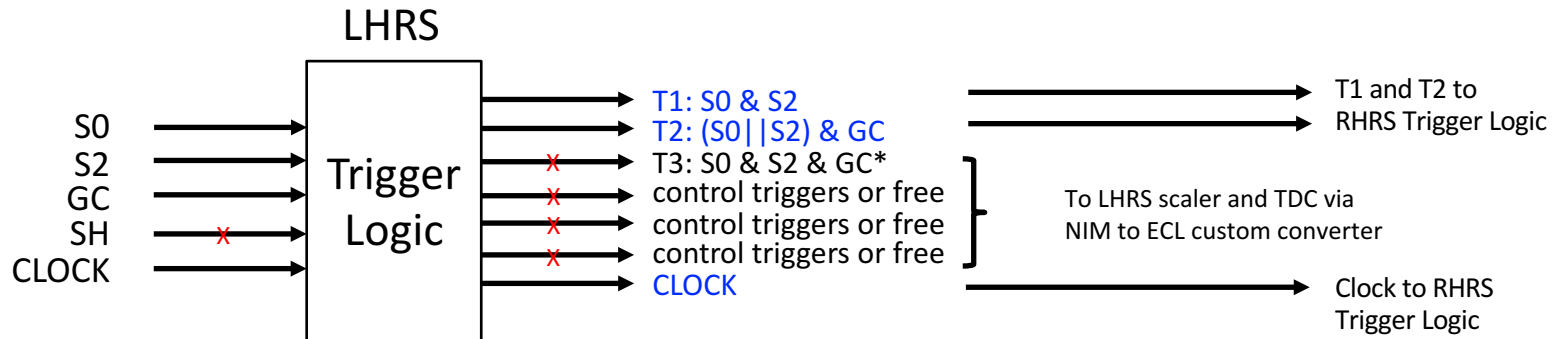

X : in/output not used in trigger design

* Connections to RHRS are intact but triggers are disabled on RHRS by TS prescales

- Some of the signals on the RHRS have to be delayed to be in time with LHRs triggers
- T1 – T3 LHRs triggers - similar for all experiments
- T4 – T6 RHRS triggers (single or coincidence triggers)

Trigger Logic for 1 DAQ mode

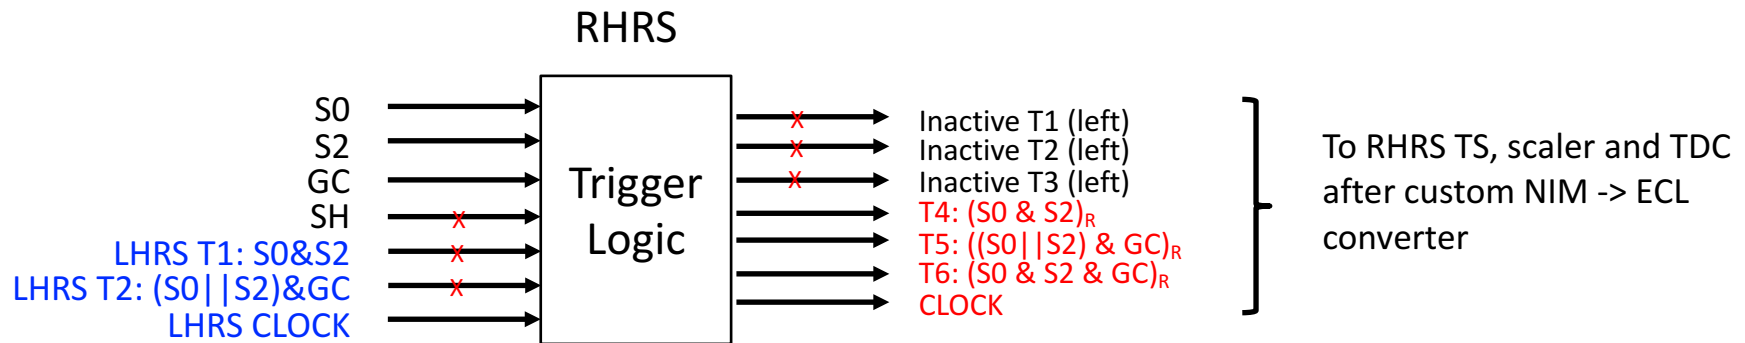

X : in/output not used in trigger design

*T3 is regenerated from T1 and T2 on RHRS to save one connection cable

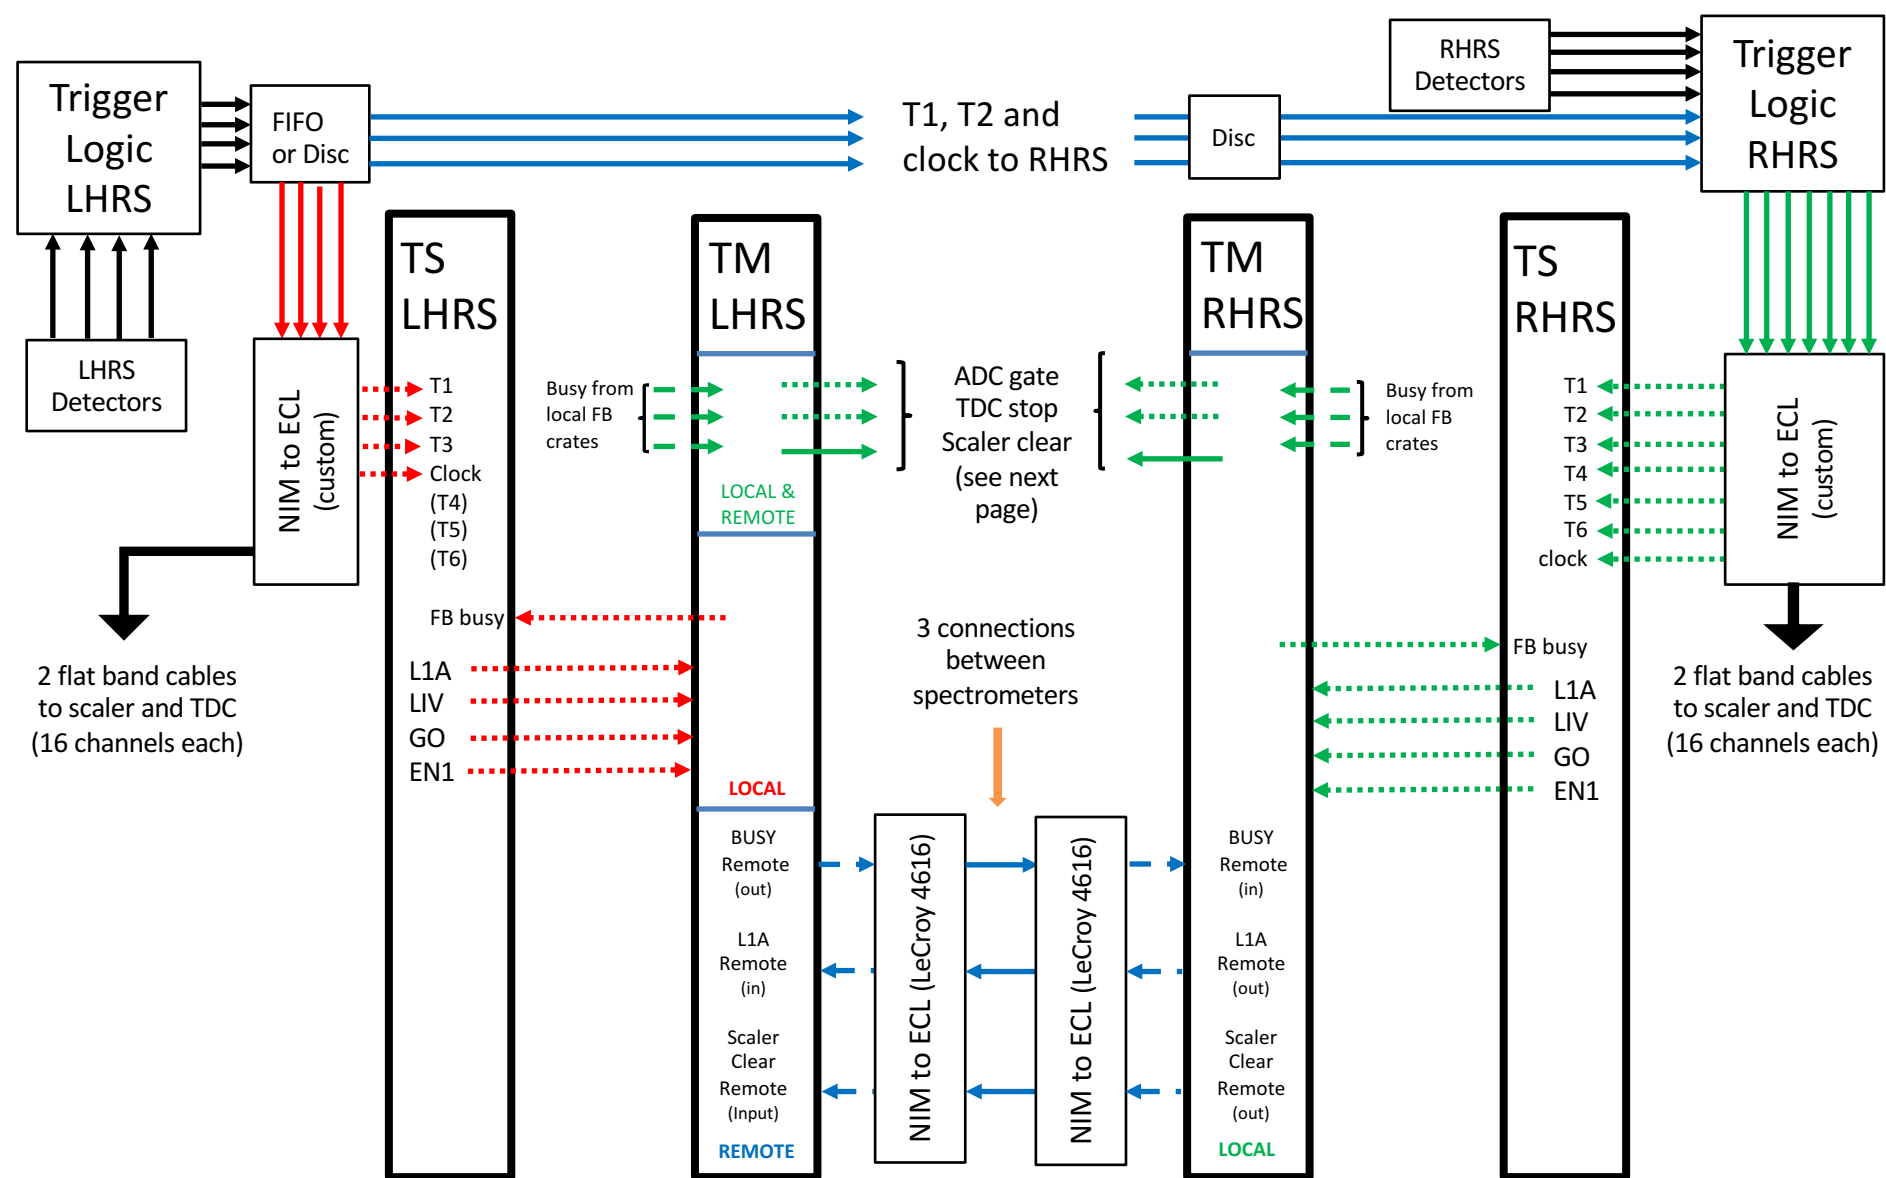

- Trigger logic can be either NIM or MLU or both with one output as control in scaler and TDC
- Some of the signals on the RHRS have to be delayed to be in time with LHRs triggers
- T1 – T3 LHRs triggers - similar for all experiments
- T4 – T6 RHRS triggers (single or coincidence triggers)

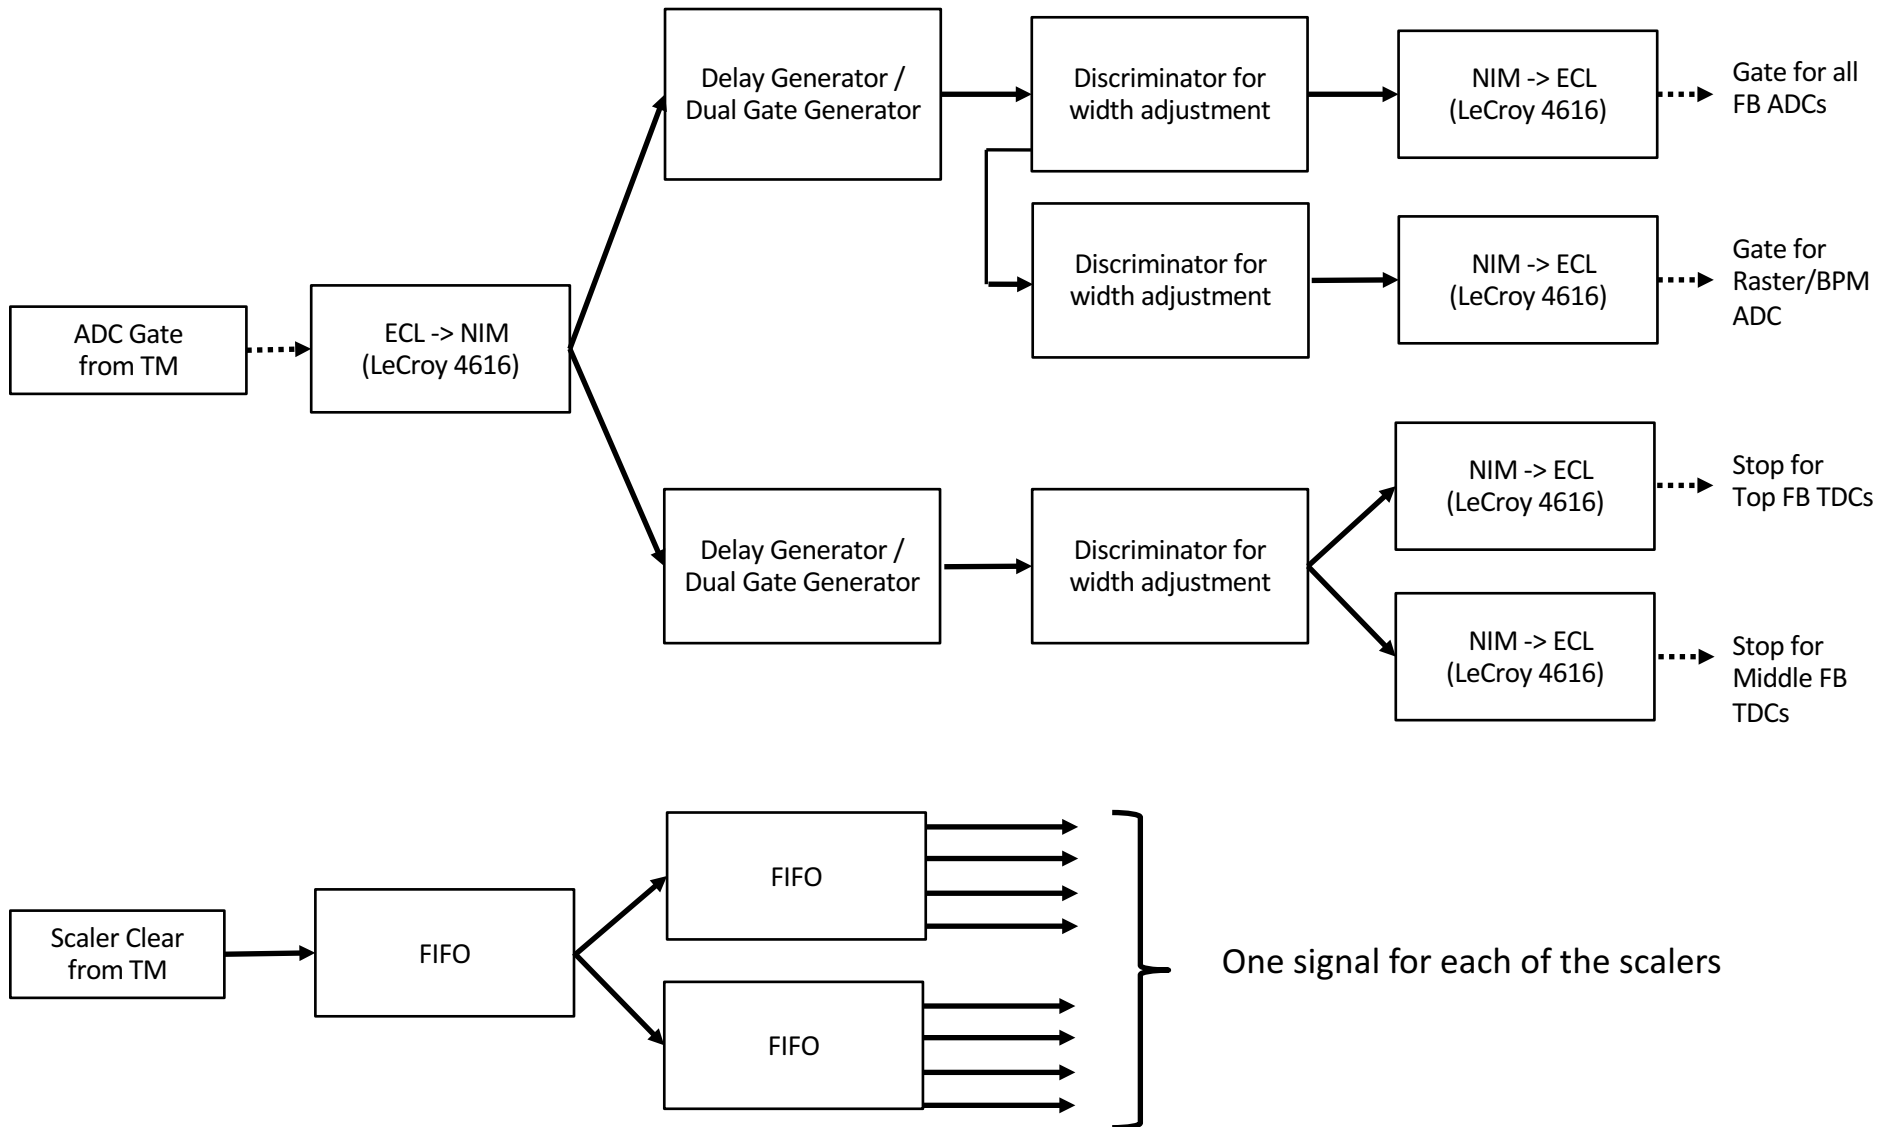

Trigger Logic for 2 DAQ mode

- Trigger logic can be either NIM or MLU or both with one output as control in scaler and TDC
- T1 – T3 LHRS single triggers
- T4 – T6 RHRS single triggers
- Single triggers are fed to the individual TS of the corresponding sides
- Using more triggers on the RHRS involves changing cables

Flow of ADC gate, TDC stop and scaler signals for both arms

Signals Exchange LHRS and RHRS

Necessary signal exchange:

- T1: NIM, fast timing
- T2: NIM, fast timing
- clock: NIM, could be slow timing
- Retiming signal: NIM, fast timing
- Scaler: ECL with LEMO TWINNAX connectors, could be slow timing
- Busy: ECL with LEMO TWINNAX connectors, fast timing
- L1A: ECL with LEMO TWINNAX connectors, fast timing
- Flatband RS485 connection TS to LHRS Fastbus crates

Available cables (found):

- 6 fast coax cables (230ns, Lemo connectors)
- 3 slower cables (don't know exact time, $\sim 0.75c$)
- 1 Flatband RS485 cable (not fully operational -> has to be tested)

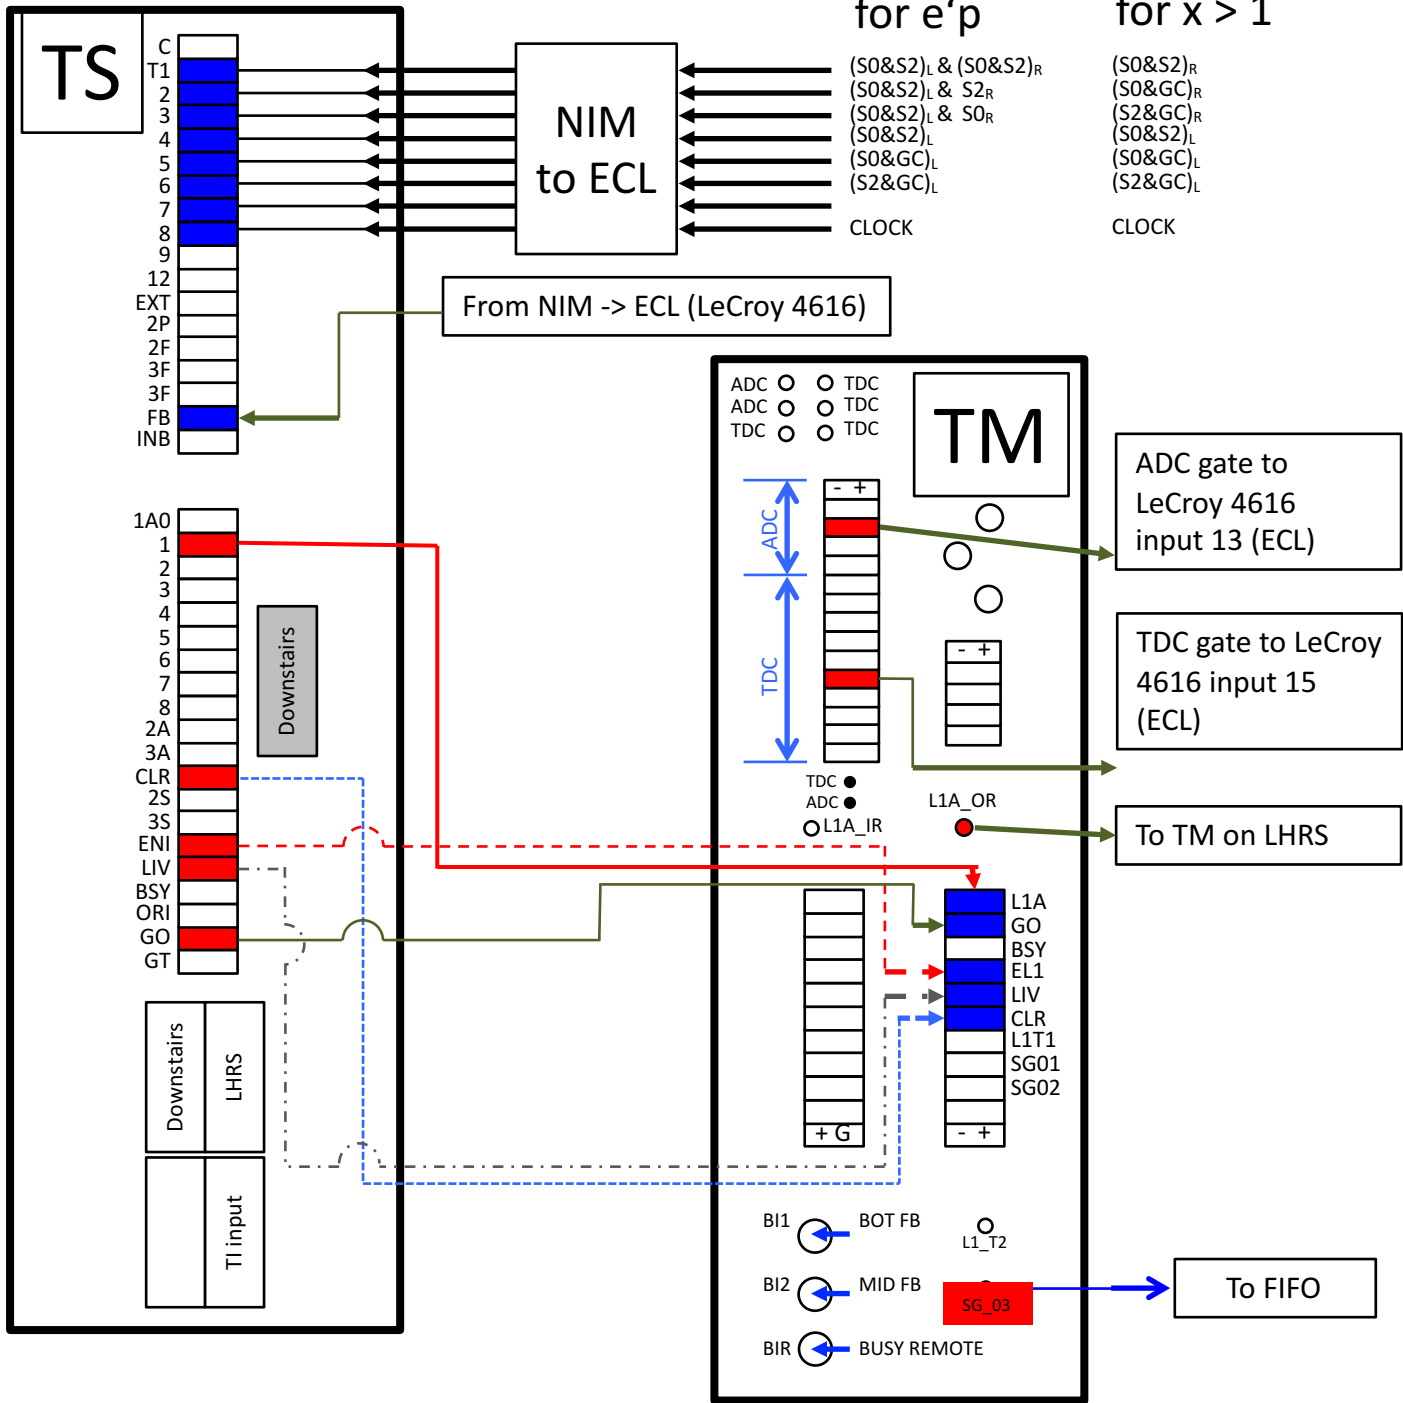

Available? (not found):

- 2 cables with LEMO TWINNAX connectors

Next slides are not up to date!!!

27 June 2017

have to be modified for correct
setup
