

# Pass 2 - Status

An Update by Tyler Hague  
Kent State University

# Mostly done

- Targets complete:
  - D2, Dummy, Empty, H1, H3, He3
- Carbon Foil will be done soon
- All but 1 positron runs complete
  - Last one currently running
- Located in:
  - `/cache/halla/triton/prod/marathon/pass2/`

# New Folder Organization

- Kins 7-16 are split based on iteration
  - 1<sup>st</sup> = before transformer issue
  - 2<sup>nd</sup> = after transformer issue
  - 3<sup>rd</sup> = Only applies to to kin 15 when we went back at end of run period
- Positron runs are split based on kinematic
  - kin1p, kin2p, kin3p, kin5p

# A Note on Energy Loss

- The Energy loss classes are only turned on for the gas targets (D2, H1, H3, He3)
- All other targets will not have the energy loss variables present
- A preliminary look at the effect of the energy loss classes showed that it only had a significant effect at the edge of our acceptance, which we cut anyway

# Looking forward...

- Please start looking at these as soon as possible and let me know if there are any issues
- Hopefully these should be good, but I'd like to catch any problems ASAP
